The Current Gaps

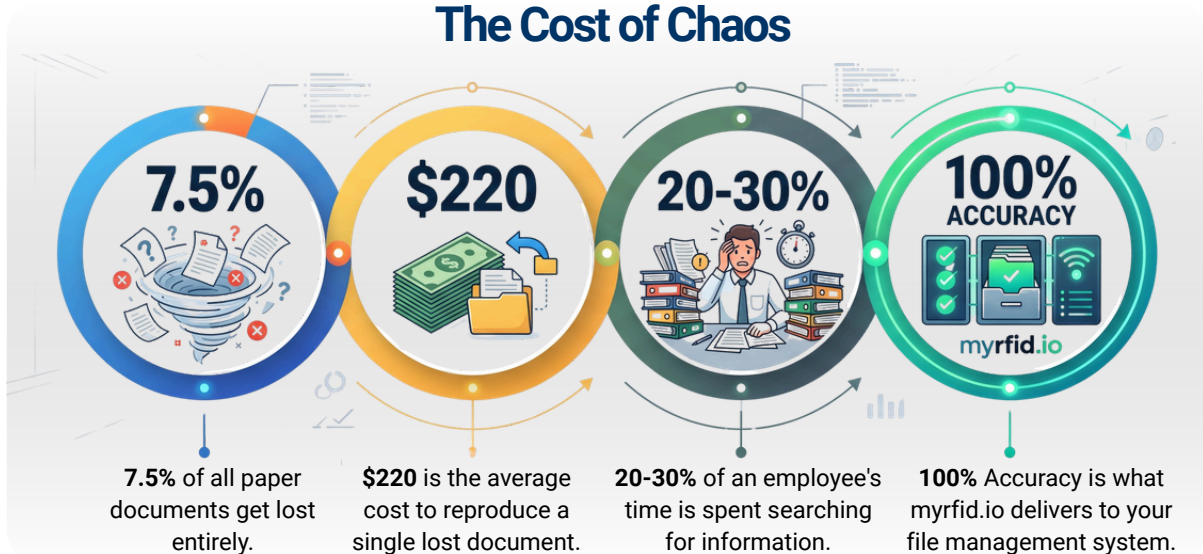

In Traditional File Management

Relying on manual logs, barcodes, or memory to track highly sensitive and important documents is no longer viable in a fast-paced business environment.

- **Time Drain:** Employees spend hours searching for misplaced files.
- **Security Risks:** Unauthorized access to confidential files goes unnoticed.
- **Compliance Failures:** Missing audit trails lead to regulatory penalties.
- **Inventory Inaccuracy:** Manual audits take weeks and are prone to human error.

The Cost of Chaos

The MyRFID.io Advantage

Replace Manual Logging with Automated Intelligence

Transform your archive into a "smart" environment by embedding discreet RFID tags, MyRFID.io bridges the gap between physical files and digital visibility, allowing you to locate and secure thousands of documents simultaneously without direct line-of-sight. Whether managing a single contract or a massive records room, our solution provides absolute control and real-time tracking for every asset.

How It Works (4 Simple Steps)

Key Features

Bulk Scanning

Read hundreds of files instantly within seconds—no more scanning barcodes one by one.

Real-Time Location System (RTLS)

Pinpoint the exact zone or cabinet where a document is currently located.

Geiger-Counter Search

Use a handheld RFID reader to find a specific misplaced file; the reader beeps faster as you get closer.

Anti-Theft Alerts

Trigger instant alarms or notifications if a tagged document passes through an exit without authorization.

Seamless Integration

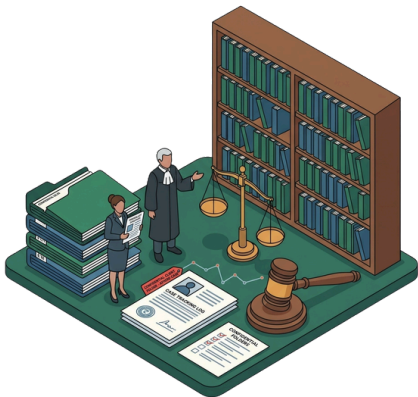

Easily integrates with your existing Document Management System (DMS) or ERP software via API.

Automated Audit Trails

Know exactly who took what file and when, ensuring absolute compliance.

Applications

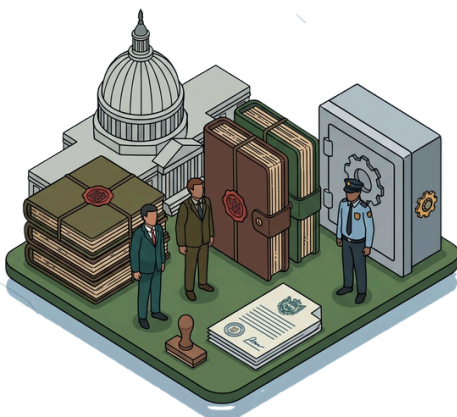

Law Firms & Courts

Tracking legal case files, evidence, and confidential client folders.

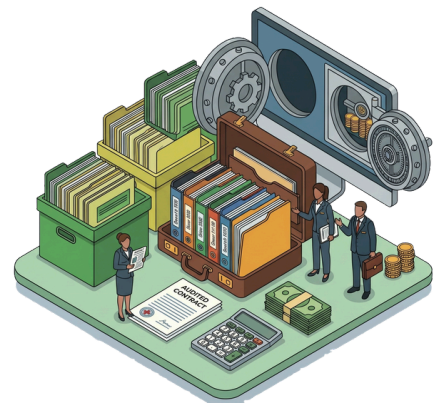

Healthcare & Hospitals

Managing physical patient records and historical medical charts.

Government & Public Sector

Securing classified documents, land registries, and national archives.

Banking & Finance

Auditing loan documents, physical collateral contracts, & wealth management files.

Education

Managing student records and examination papers.

Ready to digitize your physical document tracking?

Stop searching. Start tracking. Schedule a free demo today.
